PUBLIC RECORD.
PUBLIC RESPONSIBILITY.

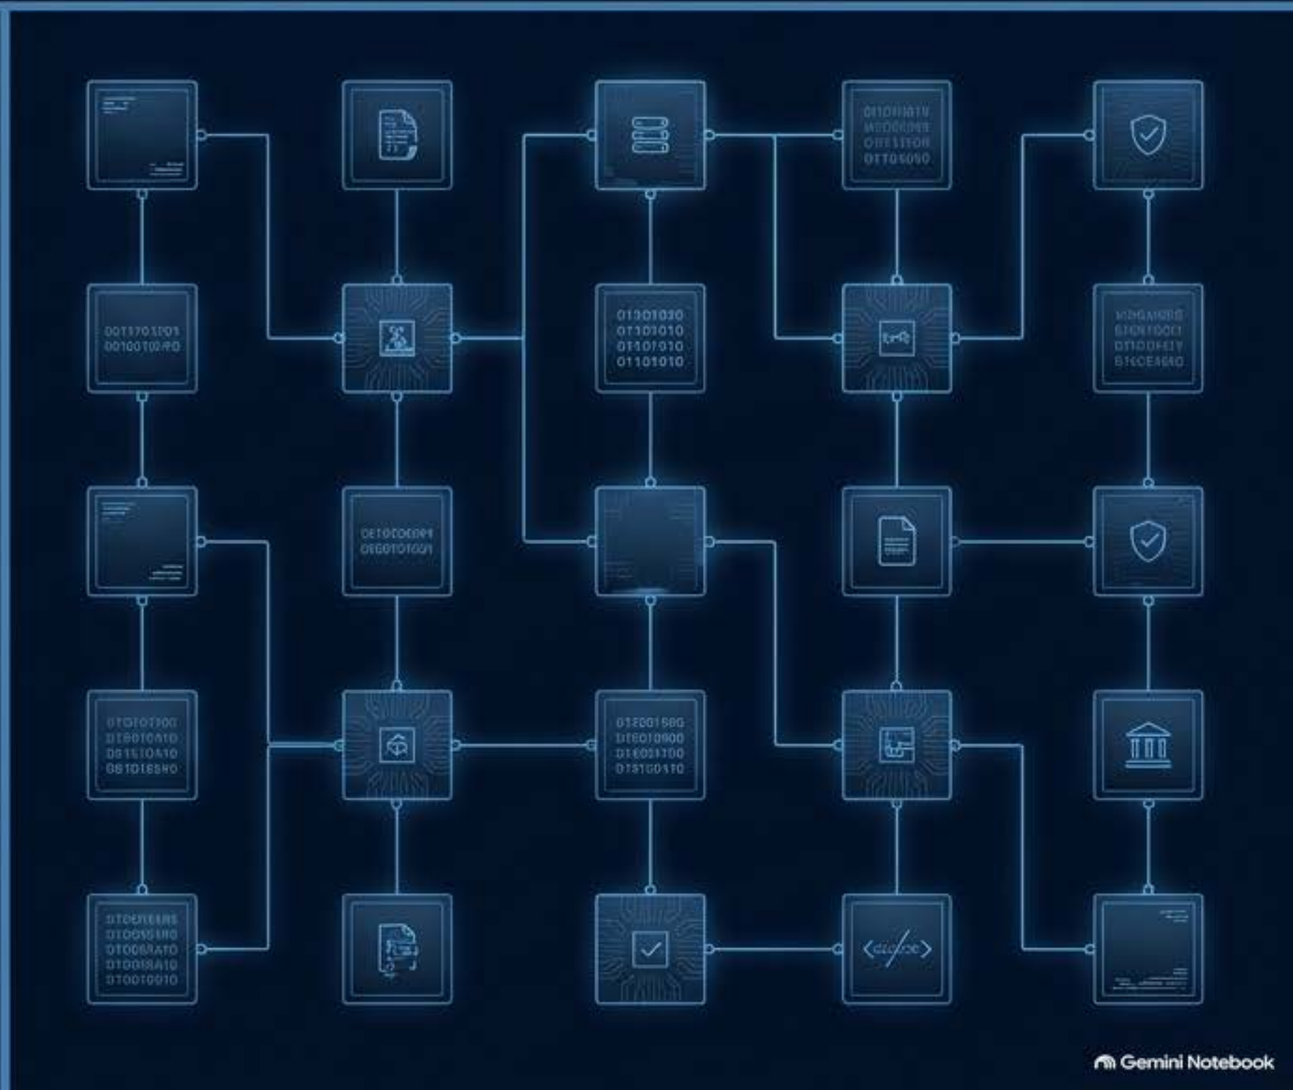

Introducing PoliticianBook — The Public Data Repository

Gemini Notebook

The paradigm of public trust has changed.

The question is no longer who we believe—but what we can verify.

Gemini Notebook

Designing the architecture of accountability.

Political decisions, commitments, public funds, and documents unified on a single, transparent, searchable interface.

Gemini Notebook

A systemic approach to public life.

Interconnected data, clear contexts, and original sources.

Politician Profiles

Offices · Commitments · Votes

Evidence & Verification

56 criteria · Methodology · Source quality

Objective Comparison

Identical fact fields · No arbitrary rankings

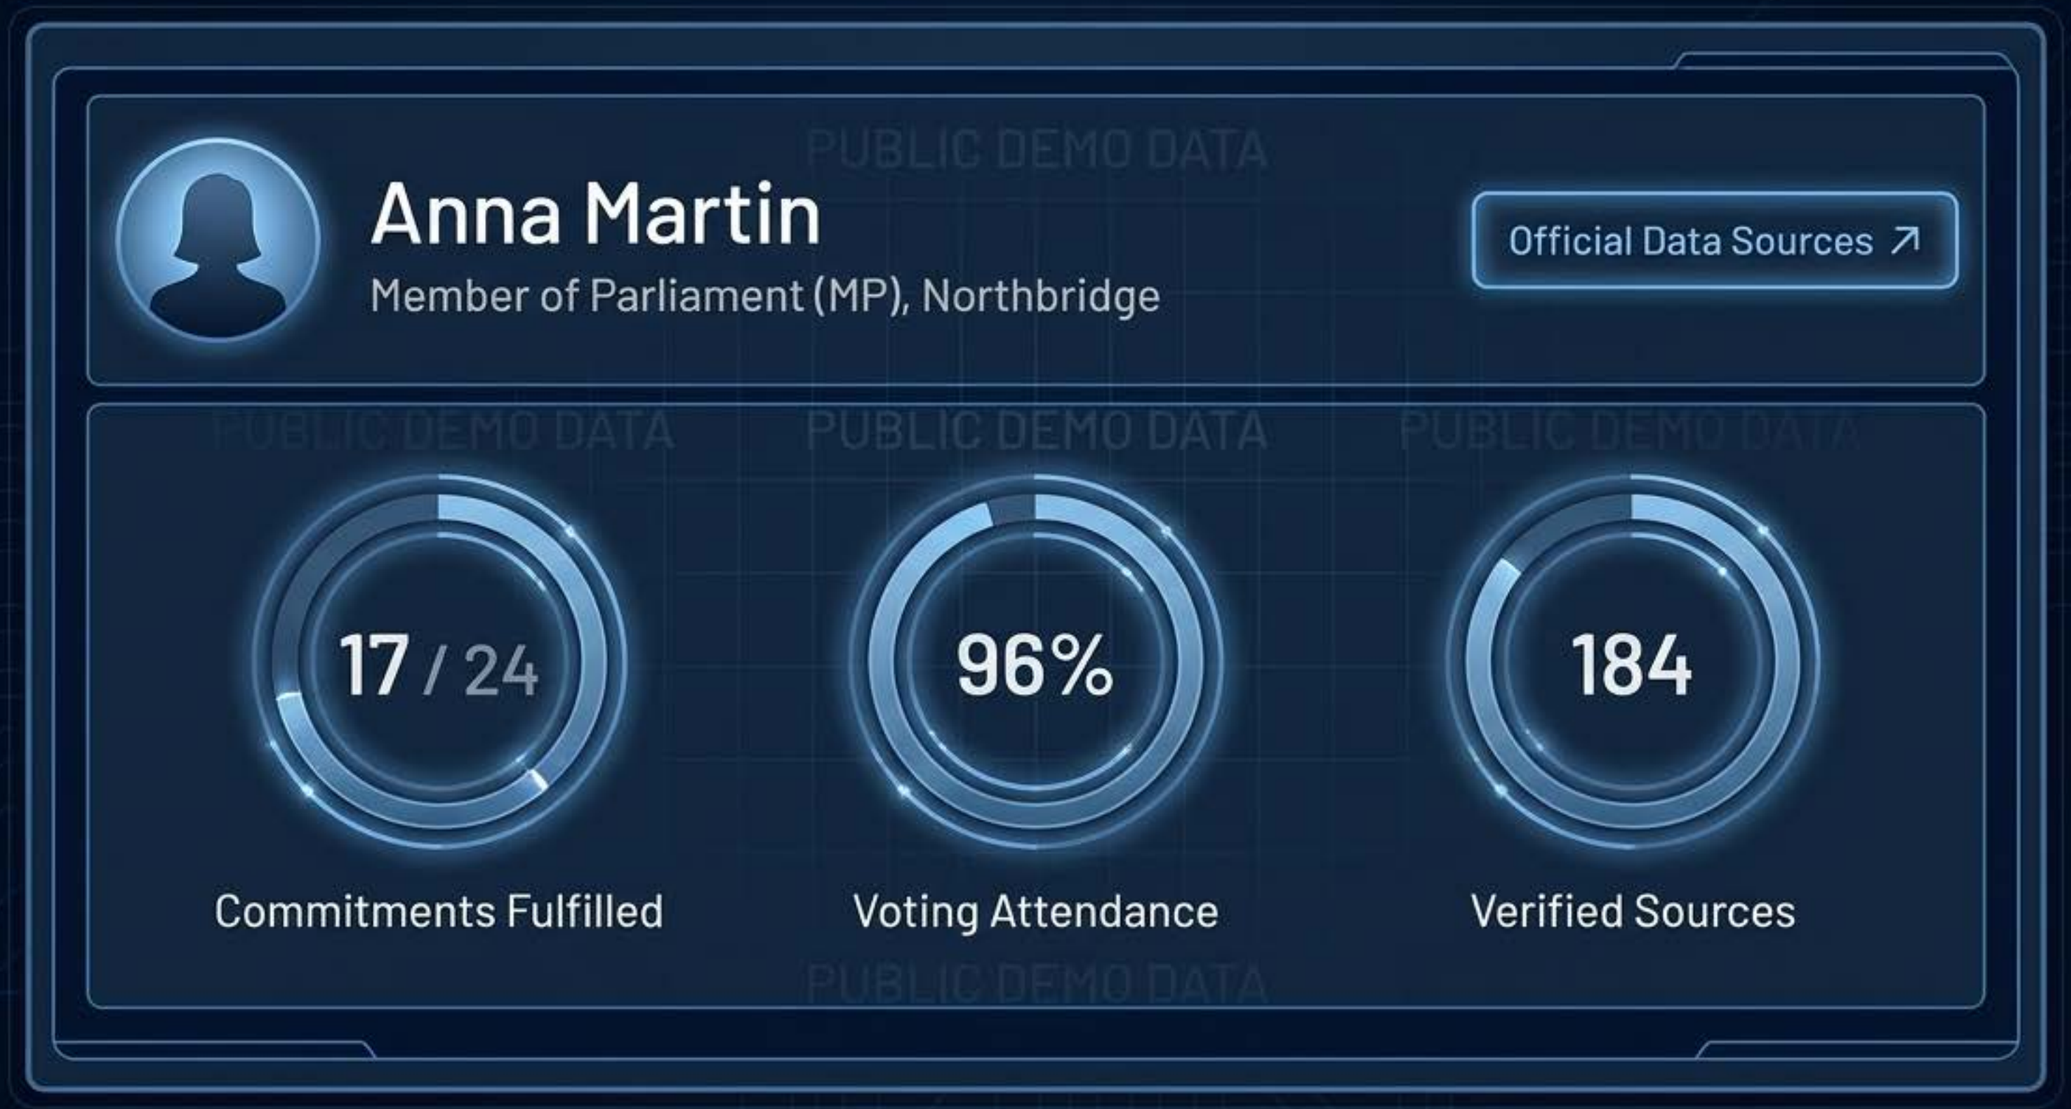

Connected Portfolios

Public Issues · Institutions · Public Funds

Gemini Notebook

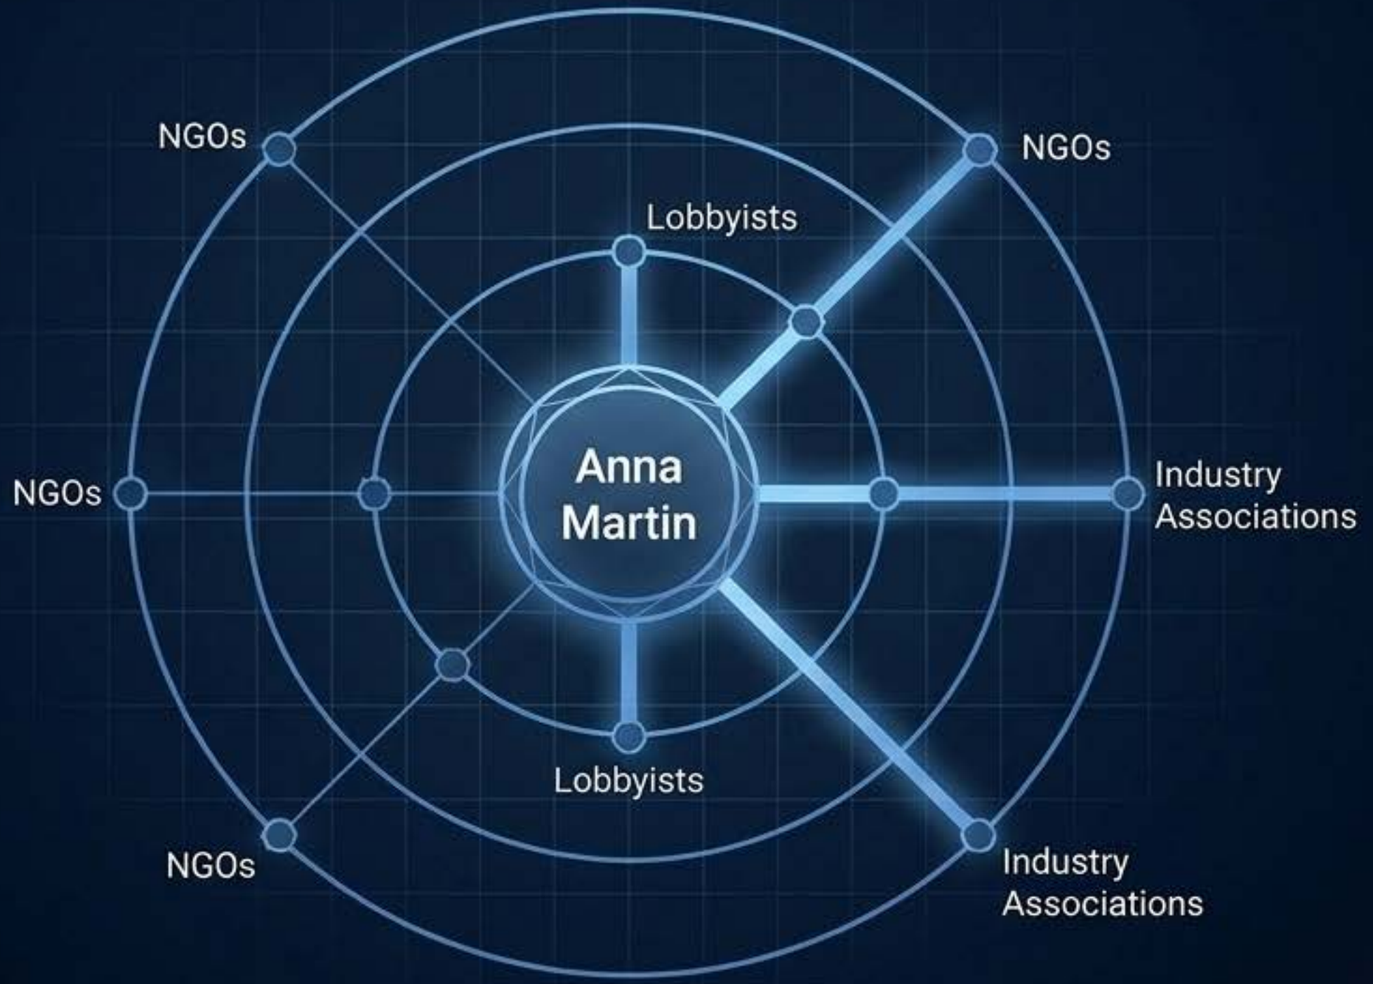

The public ledger tracks individual accountability.

Gemini Notebook

Mapping who truly shapes the decisions.

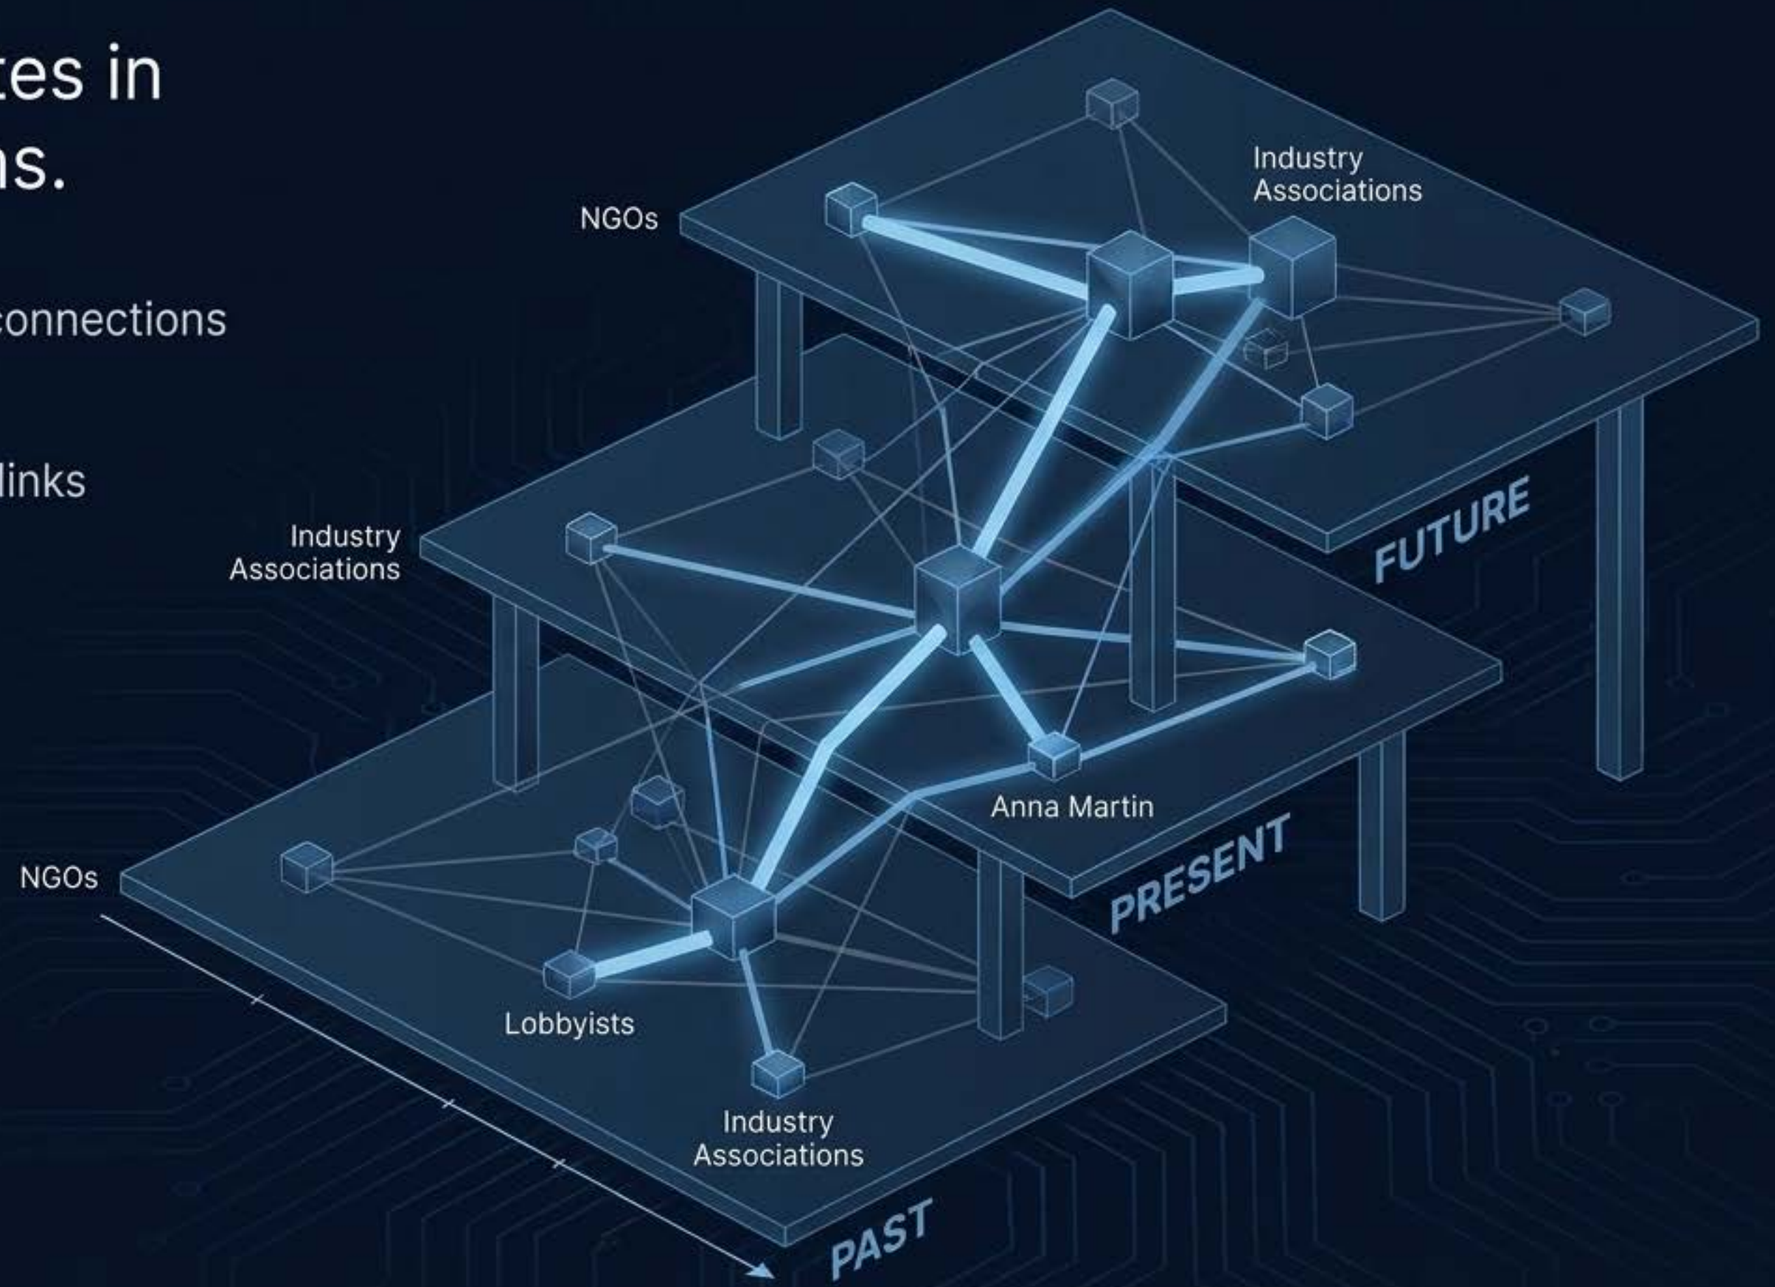

Tracking publicly documented interactions with lobbying organizations, professional associations, and NGOs. (Note: Documented negotiation does not inherently imply undue influence.)

Gemini Notebook

Influence operates in three dimensions.

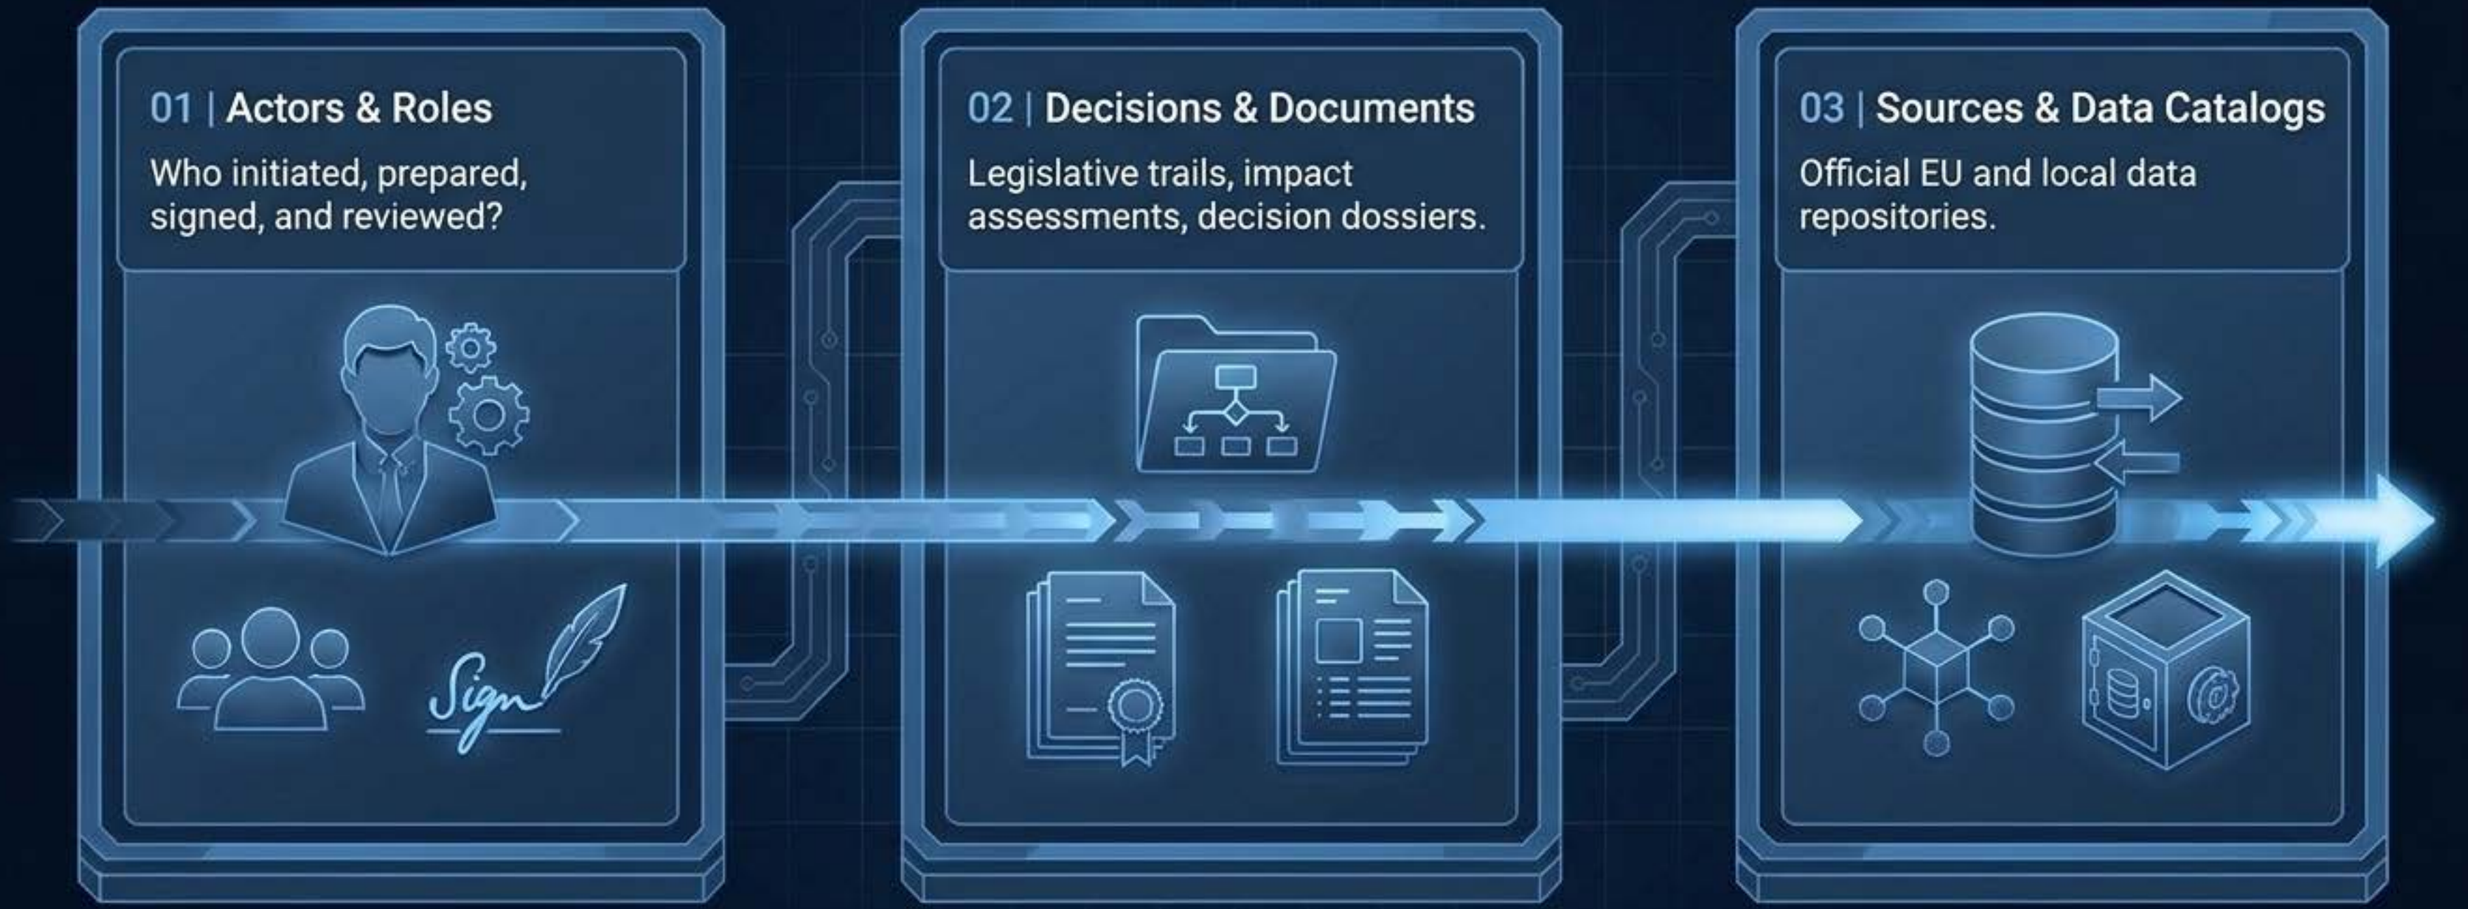

- Future / Present / Past connections
- Intensity of relationship
- Original documentation links

Gemini Notebook

Tracing the path from promise to consequence.

Showing not just what happened, but exactly how to find the original documentation.

Gemini Notebook

Objective comparison eliminates political rhetoric.

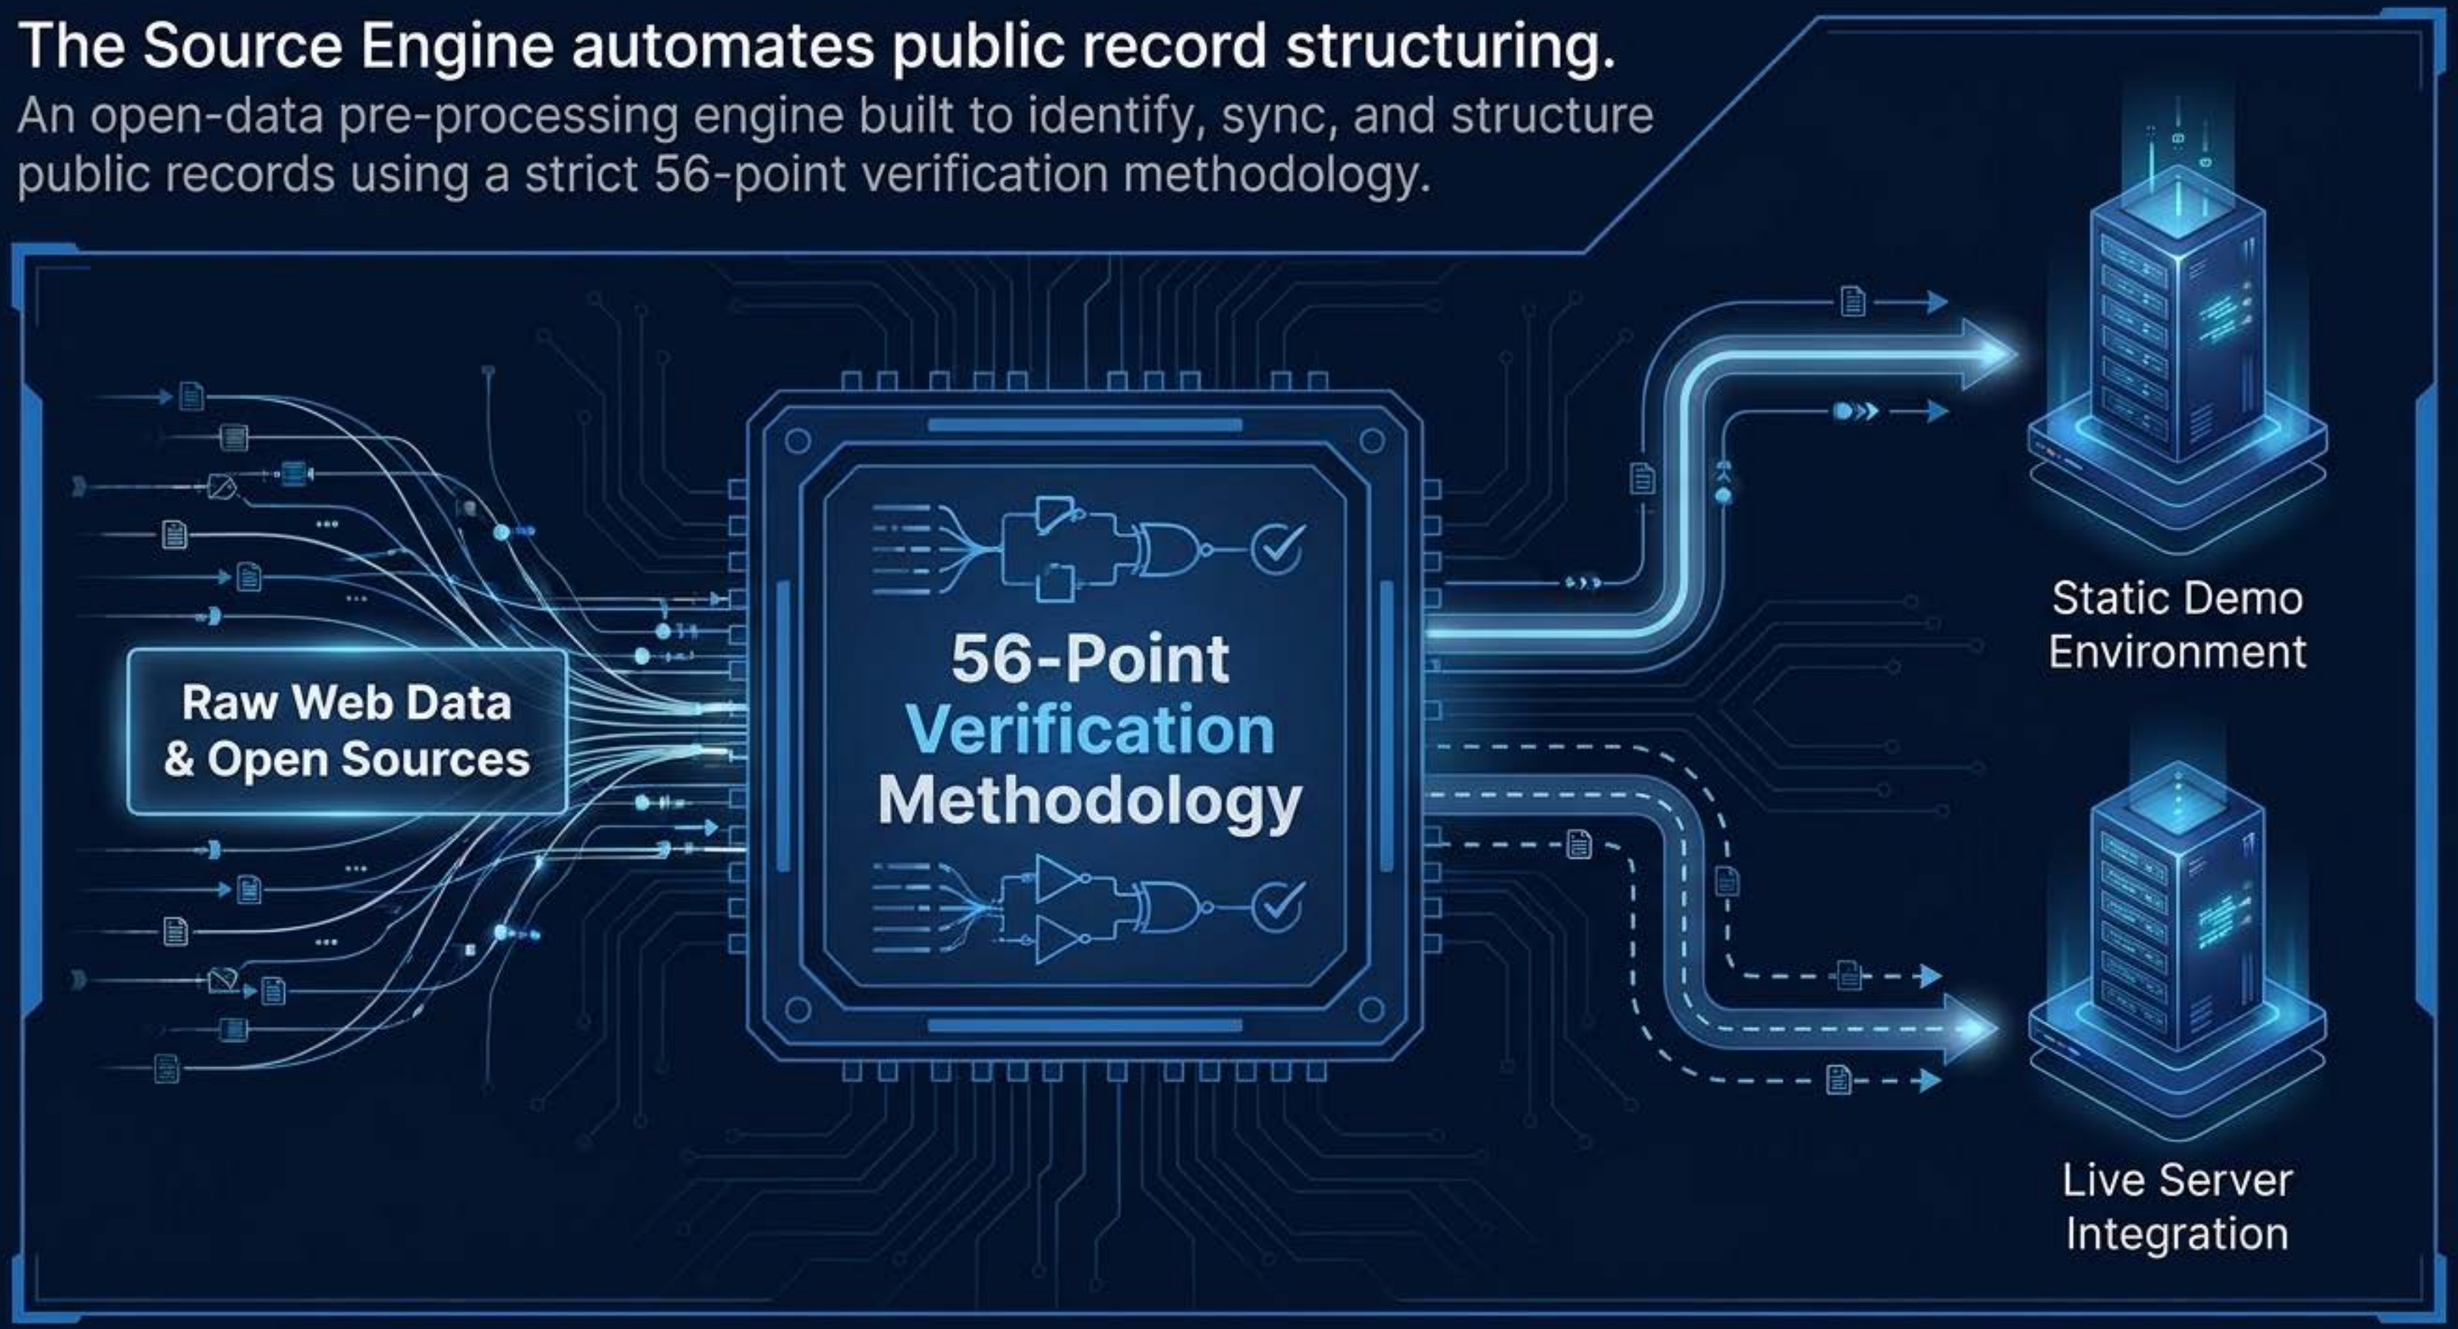

Comparing identical fact fields. No rankings, just raw data.

Gemini Notebook

The Source Engine automates public record structuring.

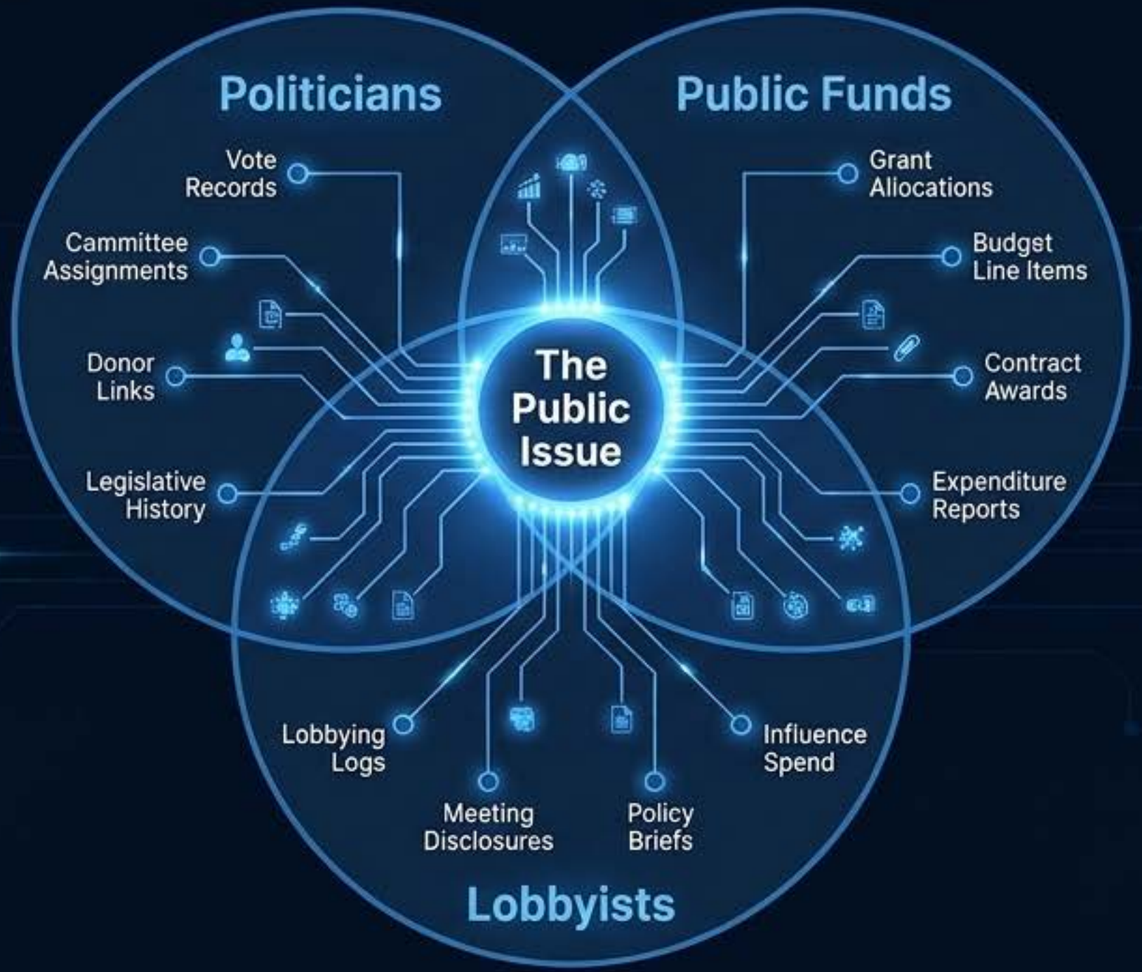

An open-data pre-processing engine built to identify, sync, and structure public records using a strict 56-point verification methodology.

Gemini Notebook

Transparency is an interconnected ecosystem.

Analyzing a single public issue simultaneously through profiles, budgets, and lobbying logs.

Gemini Notebook

Shared data demands shared responsibility.

The definitive public archive for a transparent society.
